

Sushmita Gupta

AI Engineer | Full Stack Developer | Python Developer

Kolkata, West Bengal, India • +91 7003033902 • guptasushmita166@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

AI Engineer and Full Stack Developer with hands-on experience in AI-powered business automation, ERP/HRMS solutions, payroll systems, inventory management, and full-stack web development. Skilled in Python, Django, ERPNext, Frappe Framework, REST APIs, Docker, databases, and modern web technologies. Experienced in developing scalable business applications, intelligent automation solutions, and enterprise systems.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, C

Frontend: HTML, CSS, React.js, Vite, Tailwind CSS, ShadCN UI, Responsive Web Design

Backend: Django, Django REST Framework, ERPNext, Frappe Framework, Node.js, REST APIs

Databases: PostgreSQL, MariaDB, MongoDB, MySQL, SQLite

Data Science & AI: Pandas, NumPy, OpenCV, Scikit-Learn, Matplotlib, Seaborn, Gemini API, OpenAI Whisper

Reporting & Automation: OpenPyXL, ReportLab, Excel Automation, PDF Generation, QR & Barcode Generation

Tools & Platforms: Git, GitHub, Docker, VS Code, Power BI, Axios, TanStack React Query, Google Apps Script

Core Concepts: Data Structures, OOP, DBMS, Computer Networks, SDLC, Business Process Automation

SOFT SKILLS

Problem Solving • Communication • Team Collaboration • Adaptability • Time Management • Analytical Thinking

PROFESSIONAL EXPERIENCE

AI Engineer & Software Developer | Upper Crust | May 2026 – Present (Ahmedabad)

- Developed and implemented AI-powered business automation solutions to streamline HR, payroll, and operational workflows.
- Built AI-driven review aggregation and reputation management platform for multi-location restaurant brands, automating sentiment tracking and response workflows.
- Customized and maintained ERPNext-based ERP and HRMS systems, improving employee management and business processes.
- Designed and deployed full-stack web applications and business websites using React, FastAPI, and Django.
- Automated payroll processing, salary slip generation, attendance tracking, and employee record management.
- Designed and integrated REST APIs for seamless communication between business applications.
- Developed inventory management and reporting systems to improve stock monitoring and operational efficiency.
- Managed Docker-based deployments, server configurations, and application maintenance.
- Collaborated with management teams to analyze business requirements and deliver technology-driven solutions.

Skills Used: Python, AI/ML, ERPNext, Frappe Framework, Docker, REST APIs, MySQL/MariaDB, JavaScript, HTML, CSS, Git, GitHub, Business Automation, HRMS, Payroll Systems, Inventory Management

PROFESSIONAL INTERNSHIP

Full Stack Web Development using Python & Django | Ardent Computech Pvt. Ltd. | Nov 2025 - April 2026

- Completed structured training in Python, Django, REST APIs, database integration, and full-stack web application development.
- Developed web applications using the Django framework integrated with relational databases.
- Worked on backend logic implementation, debugging, authentication, and application deployment concepts.
- Gained professional experience in real-world software development workflows, version control (Git/GitHub), and collaborative project practices.
- Participated in hands-on professional assignments bridging academic learning with industry-level development practices.

PROJECTS

Revy - AI-Powered Review & Reputation Management Platform

Tech: React 19, TypeScript, Vite, Tailwind CSS, shadcn/ui, FastAPI, SQLAlchemy, PostgreSQL, Docker

- Built a full-stack SaaS dashboard aggregating reviews from Google Business, Zomato, Swiggy, Reelo, Magicpin, and TripAdvisor for multi-location restaurant brands, with sentiment trends, NPS gauges, ratings distribution, and location leaderboards.
- Integrated AI reply generation with tone selection, 15-minute auto-sync, multi-platform OAuth, and an 'Ask Revly' chat assistant; deployed via Docker Compose on Oracle Cloud as an installable PWA.

Shagun Catering ERP

Tech: React 19, TypeScript, FastAPI, PostgreSQL 16, Docker, Google Gemini 2.0

- Engineered a role-based ERP managing the complete catering event lifecycle across 7 role-specific dashboards (Admin, Sales, Menu Planner, Presentation, Operations, Kitchen, Warehouse).
- Added Gemini-powered AI tools (menu generation, cost estimation, natural-language reports, role-aware chat) and secure JWT authentication backed by a 27-endpoint REST API.

FMS - Facility Management System

Tech: Google Apps Script, Google Sheets, HTML/CSS/JavaScript

- Delivered a web app on Google Apps Script with a Google Sheets backend, featuring role-based Admin/Employee portals, recurring daily/weekly/monthly task assignment, and real-time status tracking with audit logs.

Auto Google Business Profile Poster

Tech: FastAPI, SQLAlchemy, APScheduler, Pillow, Jinja2, Google OAuth 2.0, Docker

- Automated scheduled posting to Google Business Profiles with cross-posting to Facebook and Instagram, programmatic promotional image generation, Jinja2 post templates, and review reply drafting.

Shagun Catering Website

Tech: HTML5, CSS3, Vanilla JavaScript

- Designed a fully responsive catering website with hero slideshow, cuisine and service grids, filterable gallery, contact & WhatsApp integration, floating CTAs, and mobile-first UI.

HRMS Salary Slip Automation (WhatsApp & Email Bot)

Tech: Python, Flask, Node.js (OpenWA), SMTP

- Automated monthly salary-slip distribution via WhatsApp and Email by matching Excel employee data with PDF slips, featuring a Flask dashboard, dry-run mode, retries, and delivery summaries.

Automated Meeting Management System

Tech: React 18, Bootstrap 5, FastAPI, SQLite, OpenAI Whisper, Google Gemini

- Built a meeting automation platform for recording upload, speech-to-text transcription, AI summarization, and action-item extraction with PDF/Excel export, calendar view, and Google/WhatsApp integrations.

Payroll Generator Automation Tool

Tech: Python, OpenPyXL, Excel Automation

- Automated outlet-wise, month-wise payroll with formula-driven salary calculations, yearly consolidated summaries, and a reusable employee data generator.

ERPNext Inventory & Distribution System

Tech: ERPNext, Frappe Framework, Python, JavaScript (frappe-ui), MariaDB

- Customized ERPNext for multi-outlet distribution with Source/Outlet Order doctypes, Delivery Note challan lifecycle (accept → dispatch → receive), item-level wastage tracking, and vehicle/driver tracking.

Enterprise Inventory Management System

Tech: Django 5, Django REST Framework, React 18, TypeScript, PostgreSQL, SimpleJWT

- Built a full-stack inventory platform with multi-warehouse stock, purchase/sales orders, Code-128 barcode and QR generation with lookup API, low-stock alerts, and PDF/Excel reporting.

Facial Recognition Attendance System

Tech: Python, OpenCV, NumPy, Pandas, Scikit-learn

- Developed a face-recognition attendance system using live webcam capture and K-Nearest Neighbors, applying a full ML pipeline including cleaning, feature engineering, and Z-score standardization.

Library Management System

Tech: Django 5, Tailwind CSS, HTMX, Alpine.js, Celery, Redis

- Built a production-grade library system with role-based access, circulation (issue/return/renew), holds queue, automatic fine calculation, ISBN import via Google Books API, and a patron self-service portal.

EDUCATION

B.Tech - Computer Science & Engineering (Data Science)

Brainware University | 2022 - 2025 | Score: 77%

Diploma - Electrical Engineering

Elite Institute of Engineering & Management | 2019 - 2022 | Score: 74%

Secondary Education

Deshbandhu Vidyapith for Girls | 2018

CERTIFICATIONS

- Python Programming - Udemy (2024)
- Mastering MySQL - Udemy (2024)
- Java Programming: Basic to Advanced - Udemy (2024)
- Ai Fluency: Framework & Foundations – Anthropic (2026)

ACHIEVEMENTS

- 1 st Runner-Up - Computer Awareness Program organized by Webel Technology Limited.
- Developed multiple real-world software solutions including HRMS, ERP systems, payroll automation tools, inventory management applications, and AI-powered reputation and attendance systems.
- Active contributor to personal software development projects hosted on GitHub.
